

CLAIMS

What is claimed is:

1. A gaming apparatus comprising:

10 (A) a plurality of rotatable disks having a common axis of rotation, each of the rotatable disks:

i. being separately rotatable;

ii. having a band of indicia thereon;

15 iii. having a peripheral region which is of greater diameter than the band of indicia; and

iv. having an annular band of gear teeth at the peripheral region;

(B) a plurality of drive gears, each drive gear engaged with the band of gear teeth of a rotatable disk; and

20 (C) a plurality of drive motors, each drive motor engaging a drive gear to turn the drive gear.
